Replacement Coils for Every Industry | Replacement Engineering Made Easy

What We Offer

EXCEPTIONAL CUSTOMER SERVICE

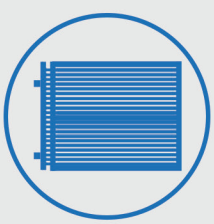
The professionals at USA Coil & Air will serve you with relevant information to make your build-to-order equipment purchase a low-stress experience. We provide personal service from your first phone call through order delivery. This includes coil selection, same day quote, concise information on product options, and updates on the delivery schedule.

ON-SITE EVALUATION

USA Coil & Air has a broad network of skilled reps across the United States and Canada. When you have questions in the field, we are there to provide answers. Our reps will come to your job site, quickly evaluate the situation, and offer guidance. Working with our inside sales team, your rep will provide timely quotes and custom drawings for your approval. Call us at 800-USA-COIL to find a rep in your area.

SUPERIOR FREIGHT SERVICE

It is not by chance that we have the lowest freight damage in the industry. We continuously update our crating process and develop methods that limit all possible damage through freight transport. Custom crates are built around every coil. All of our products ship standard freight allowed, which means no shipping costs for you. Our service doesn't stop there, if there is an issue with freight damage, we will help you file the claim.



CUTTING EDGE COIL SELECTION / SIZING SOFTWARE

USA Coil & Air's coil selection program is the most intuitive and easy to use sizing software application in the industry. Our free software, available for engineer use, quickly generates performance charts and drawings after just a few steps. Engineers can request the software today at www.usacoil.com

Contractors, distributors and end-users reach out to our sales team for individualized help with project selections. Our experienced sales engineers will run sizing and performance selections based on your requests. Call today 1.800.USA.COIL

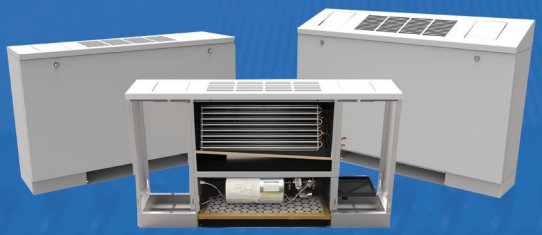
USA COIL & AIR PRODUCT OVERVIEW



VERTICAL & HORIZIONTAL FAN COIL

These vertical/horizontal fan coils, ceiling, wall, and room-mounted units can be designed to meet any requirement. Special control systems or valve packages available

MODULAR AIR HANDLING UNITS

Our extensive modular central station unit line includes double wall units, horizontal, vertical, or blow-through designs, and many accessories. These indoor and outdoor Central Station Air Handling Units can be shipped in sections to ensure easy transportation and installation.

BELT DRIVE AIR HANDLING UNITS

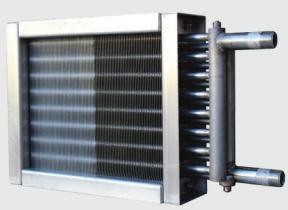
Commercial/light industrial belt drive indoor air handlers from 2 to 20 tons, chilled water or refrigerant cooling, are available. Options include; hot water or steam heating, mixing box, and discharge grills.

AIR COOLED CONDENSERS & FLUID

For sizing and ultimate performance of these units you need a quality engineer with access to a line of units that can match your requirements while saving size, weight, and money for the entire life of the unit.

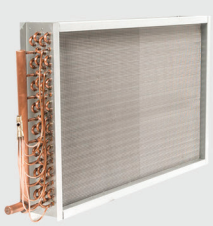
BURST RESISTANT

Developed by USA Coil & Air, the Sentry Guard™ addresses the need for freeze protection by providing internal pressure relief before catastrophic damage can occur. Our patented burst resistant design guarantees against freeze damage.



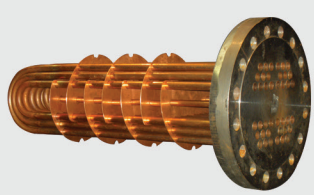
INDUSTRIAL & PROCESS COILS

We offer Industrial Heating, Cooling, and Process Coils in all types of arrangements and constructions to meet your requirements. Included are; cleanable tubes, fabricated headers, removable cores, and air-tight casings. Materials include: cupro-nickel, carbon steel, stainless steel, and a selection of industrial coatings made for high temperatures, high pressure, and corrosive applications.



WATER, STEAM & REFRIGERANT

We offer 5/8", 1/2", and 3/8" OD water, steam, and refrigerant coils. We also offer 1" OD steam coils that can be built to meet almost any deadline. The make and model number are often all you need to get a quick quote.



TUBE BUNDLE & HEAT EXCHANGERS

USA Coil & Air can duplicate any existing bundle with exact dimensions, materials, and performance; there is no need to worry about certain designs being out of production. We provide replacement shell/tube or internal tube bundles for water-to-water or steam-to-water heat exchangers.
